

Riley Brown

rydb@proton.me | rbrown71@nebraska.edu | ry3b.github.io | github.com/ry3b

EDUCATION

University of Nebraska-Lincoln

B.S. Mathematics and Data Science, Minor in Computer Science, Lincoln, NE | May 2023 - May 2027 (expected)

- GPA 3.92/4.00
- University Honors Program

Budapest Semesters in Mathematics

Study abroad, mathematics, Budapest, Hungary | Jan 2026 - Jun 2026

EXPERIENCE

Undergraduate Researcher - Quantum LDPC Codes

University of Nebraska-Lincoln, Lincoln, NE | Fall 2026

Research Assistant, pseudorandomness

North Carolina State University, Raleigh, NC | Summer 2026

- Worked through Ta-Shma's construction of epsilon-balanced codes and the surrounding literature as a research partner with Prof. Chin Ho Lee rather than in a supervised role
- Developed simpler constructions of epsilon-balanced codes
- Made minor improvements to the construction of Hsieh, Mohanty and Zheng

Research Assistant, 3-uniform hypergraphic degree sequences, FPT algorithm feasibility

Budapest Semesters in Mathematics, Budapest, Hungary | Spring 2026

Summer Researcher, algorithm design

Harvey Mudd College, Claremont, CA | Summer 2025

- Collaborated with a team of four students to analyze and improve exponential-time algorithms for the sumset recognition problem, an NP-complete problem in additive combinatorics
- Enhanced branching approaches and refined base case parameters for graph-theoretic reduction methods through systematic analysis of algorithmic complexity
- Presented findings at the REU symposium and continued independent exploration of the problem space

PROJECTS

Poker Trainer

A terminal and Tkinter drill trainer for poker skills: pot odds, combos, equity, bet sizing, push/fold and ICM, with an adaptive scheduler that weights drills by weakness and staleness. | python | 2026

SKILLS

Languages: Python, MATLAB, Java, SQL, LaTeX

Libraries and tools: NumPy, SciPy, Pandas, Matplotlib, scikit-learn, PyTorch, TensorFlow, Git, Jupyter

RELEVANT COURSEWORK

Mathematics: Bijective Partition Theory, Discrete Mathematics, Matroid Theory, Advanced Combinatorics, Graph Theory, Probability Theory, Linear Algebra, Algebra I, Coding Theory

Computer Science: Development and Analysis of Algorithms, Automata, Computation, and Language, Data Structures and Algorithms, Data Analysis, Math for Machine Learning
